

TESTING DOES NOT CHANGE THE TREATMENT

LIMITED TESTING IS CURRENTLY AVAILABLE FOR THOSE WITH DOCTOR'S ORDERS, HOSPITALIZED PATIENTS, HEALTHCARE WORKERS AND FIRST RESPONDERS

If you are anxious about not being able to get tested for COVID-19, remember testing DOES NOT change the treatment!

- If you are feeling symptoms related to COVID-19 (*symptoms commonly include fever, dry cough & shortness of breath*), STAY HOME!
- Separate yourself from other household members and stay in home isolation until 3 things have happened:

At least 7 days have passed since symptoms first appeared

Have been fever-free for 72 hours (3 days) without the use of medication

Other symptoms have improved, such as cough or shortness of breath

ISOLATION

FOR PEOPLE WHO ARE ILL:

- Separates people who have a very contagious disease from those who are healthy.
- Restricts the movement of people who have contagious disease to stop the spread of illness.

QUARANTINE

FOR PEOPLE WHO HAVE BEEN EXPOSED, BUT ARE NOT ILL:

- Applies to people who are not yet ill, but have been exposed to very contagious disease.
- Applies to the separation and restriction of movements of people.
- Is a public health strategy to stop the spread of a very contagious disease.
